

# Instructions for setting of the PAdES B-B signature format

It is an advanced electronic signature according to eIDAS, PAdES: B-B format (that means the electronicsignature does not contain a nested Time Stamp) and usage of signature certificate on the qualified signature device (for example smart card) is not required.

After opening Adobe Reader application, click on **“Menu”** button and select **“Preferences”**. A new window will be open (see below). In the left column choose the option **“Signatures”** and in the field **Creation & Appearance** click on **“More...”**.

According to the picture bellow, click on **Default Signing Format** and select **CAAdES-Equivalent** from the list. Click on the **“OK”** button and now everything is set up.
